

VIOLINABOX

an International Violin

This violin was built by 10 violinmakers in 9 countries across the world. We each used materials local to our homes to create this unique instrument.

The Violinabox is now traveling the world raising money to support Luthiers Sans Frontiers-USA and collecting recordings of a diverse range of violin music.

Visit our website violinabox.org to:

- Read, and see video about making the violin
- Follow the travels and adventures of the violin
- See the video recordings that we have collected

The travels of the violinabox are paid for entirely by the generous support of the violin shops who host it. Thank you!

The Violinabox Project supports

LUTHIERS SANS FRONTIERS USA

LSI-USA is a volunteer group of violinmakers, musicians and donors who collect and give instruments and strings to music programs in developing countries. More importantly, they **train local instrument repairers and restorers** to look after their own instruments.

Visit the lsfusa.org website where you can

Donate generously to help support the joys and benefits of music in the developing world.
